Hair 55 Inches Long Grown by Cuticura.

MISS D., of L., sends us through our British Agents, Messrs. F. Koverly & Sons, 27 and 28, Chancery Square, London, E.C.4, a strand of soft, glossy hair cut from her own head and measuring fifty-five inches in length, of which the enclosed drawing is a photographic facsimile. She attributes her magnificent growth of hair to frequent shampooing with Cuticura Soap, followed by light dressings of Cuticura gently rubbed into the scalp. Previous to the use of Cuticura, her hair was dry, thin, and lifeless, and came out in handfuls to such an extent that she feared she would lose it.

This is but one of many remarkable cases of the preservation and restoration of the hair in seemingly hopeless cases by warm shampoos with Cuticura Soap, followed by light dressings of Cuticura, purest of emollient skin cures. This treatment at once stops falling hair, clears the scalp of crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates the hair follicles, supplies the roots with energy and nourishment, and makes the hair grow on a clean, sweet, wholesome, healthy scalp, when all else fails.

MILLIONS OF WOMEN use Cuticura Soap exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, and for all the purposes of the toilet, bath, and nursery.

Complete External and Internal Treatment for Every Humour.

Cuticura Soap is the best of all skin cures, and is the only one that cleanses the skin of all impurities, and restores it to its natural state. It is the only one that cures the most torturing, disgusting, and humbling skin, scalp, and head ailments, with loss of hair, when all else fails. It is the only one that cures the most terrible skin, scalp, and head ailments, with loss of hair, when all else fails. It is the only one that cures the most terrible skin, scalp, and head ailments, with loss of hair, when all else fails.

Wholesale: G. H. Holborn Viaduct, E.C.

Dr. J. Collis Browne's CHLORODYNE

COUGHS, COLDS, ASTHMA, BRONCHITIS.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Dr. J. COLLIS BROWNE (late Army Medical Staff) DISCOVERED A REMEDY, to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying chemical analysis), and since the formula has never been published, it is evident that a compound is identical with Dr. Browne's Chlorodyne must be false.

This caution is necessary, as many persons deceive purchasers by false representations.

DR. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See The Times, July 18, 1884.

DR. J. COLLIS BROWNE'S CHLORODYNE IS THE TRUE PALLIATIVE IN NEURALGIA, GOUT, CANCER, TOOTHACHE, RHEUMATISM.

IS THE GREAT SPECIFIC FOR DIARRHOEA, DYSENTERY, CHOLERA.

GENERAL BOARD OF HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally being sufficient.

Dr. GIBSON, Army Medical Staff, Calcutta, states: "TWO DOSES COMPLETELY CURED ME OF DIARRHOEA."

DR. J. COLLIS BROWNE'S CHLORODYNE is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm, refreshing sleep, without a HEADACHE, and invigorates the nervous system when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE Rapidly cuts short all attacks of EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

IMPORTANT CAUTION.—The IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe Trade Mark. Of all Chemists, 1s. 1/4d. 2s. 9d. & 4s. 6d. SOLE MANUFACTURER: J. T. Davenport, 85, Great Russell Street, London, W.C.

LATE TELEGRAMS.

Martinique Warned.

London, May 22.—A party from Palermo, recovering bodies in Martinique, had the narrowest escape from a fresh epidemic on Tuesday.

Calcutta, May 21.—Special telegrams to the *Asiatic* dated London, May 20th, state that from letters received in London, dated a week before the St. Pierre disaster, it appears that the epidemic did not take place without warning. On the 2nd instant the air was full of volcanic dust. One correspondent says that life there was almost unbearable; people were getting faint, and a general feeling was abroad that a calamity was impending. St. Pierre was destroyed five days after this letter was written.

Casualties in South Africa.

Siamo, May 21.—The following further casualties are reported:—
May 17.—At Springfontein:—Died of dysentery: Lieutenant Miller, 3rd Royal Lancers; Captain Fennell.
May 16.—At Riverdale:—Colonel-bone accidentally killed: Captain Chudleigh, Cape Colonial Force.
May 17.—At Winburg:—Died from inflammation of the stomach: Acting Chaplain S. W. Stevens.
May 10.—At Allamoor:—Accidentally killed: Second Lieutenant French Blake, 2nd East Kent Regiment.

The Maymoy Military Riot Case.

Calcutta, May 22.—In the Maymoy riot case, yesterday, eight witnesses were examined, after which the case for the prosecution was closed. The prisoners have been sent by special train to Monday, where the defence will be heard. Regarding Captain Owens' evidence, it is stated that he was picked out, but he could not swear to the right man. Captain Hogg-Waters was still unable to attend Court.

PROMPT ACTION

In dealing with what may be only a slight cough, will often avert some serious illness.

STEARNS' COUGH CURE

is just the thing for this, as it is always speedy and effective. Wholesale from A. S. Watson & Co., Ltd., Hongkong.

One idea of persons is for a woman to hold her head of society while her baby is cutting its teeth.

Intermittent in the blood.—We have seen lots of letters from people who have received great benefit from the use of Clark's Blood Mixture. It cannot be too highly estimated, for it cleanses and clears the blood from all impurities. This is a good testimonial from the *Family Doctor*, which goes on further to say: "It is the best Blood Purifier that science and skill have brought to light, and we can with the utmost confidence recommend it to our subscribers and the public generally." For Scour, Scoury, Eczema, Bad Legs, Skin and Blood Diseases, Pimples and Sores of all kinds, it effects are unparalleled. "Thousands of wonderful cures have been effected by it." Clark's Blood Mixture is sold everywhere, at 2s. 6d. per bottle. Beware of worthless imitations and substitutes.

CHEAP EXCURSIONS.

TO BANFF IN THE CANADIAN ROCKIES THROUGH THE MOUNTAINS OF BRITISH COLUMBIA.

With the increasing demand of residents in the Far East for a holiday which will combine a complete change of scene and climate with a pleasant restful trip, which can be made during a short leave period at a minimum expense, the CANADIAN PACIFIC RAILWAY COMPANY has decided to issue during the coming hot season Cheap Excursion Passages to Banff at an inclusive fare which will cover steamship and rail transportation (sleeping on land and made on railway) and accommodation at C. P. R. Hotels during the stay in part of the 'Empress' at Vancouver, as follows:—
INCLUDING BIRTH AND MEALS ON RAILWAY AND HOTEL ACCOMMODATION.

From Hongkong or Shanghai: Cabin, European Servant, Native Servant.
From Hongkong or Shanghai: £58 £50 £25

TIME OF TRIP.—Leaving Hongkong, the time for the whole trip is 64 days, which permits 12 days on the other side, to be spent in the mountains as desired. The tickets are good for four months, and if a longer time than 12 days is wanted, passengers can suit themselves, being at their own expense after the date of the return sailing of the 'Empress' from Vancouver.

BERIA AND SHIALS ON RAILWAY are included for the trip in both directions between Vancouver and Banff.

C. P. R. HOTELS.—The Company maintains first-class Hotels at Vancouver, North Bend, Seanoors, Revelstoke, Glacier Field, Chale, Lake Louise and Banff, and passages will include accommodation there during the 12 days allowed before return sailing of the 'Empress' from Vancouver.

FAMILIES WITH SERVANTS.—The servants' passages have been especially made with the view of enabling families with children and servants to take advantage of the trip at a minimum cost.

ADDITIONAL INFORMATION will be furnished on application to any of the Company's Agents, and Folders, Pamphlets, Maps, etc., sent to any address, giving information in detail about Banff and the entire trip.

THE BOLD ASSERTION
REMARKING CHAMBERLAIN'S COLIC, CHOLERA
AND DIARRHOEA REMEDY.

1. It affords quick relief in cases of
colic, cholera mucus and pains in the
stomach.
2. It never fails to effect a cure in the
most severe cases of dysentery and diarrhoea.
3. It is a sure cure for chronic diarrhoea.
4. It can always be depended upon in
cases of cholera infantum.
5. It cures epidemic dysentery.
6. It prevents bilious colic.
7. It is so potent and effective in curing
all bowel complaints.
8. It never produces bad results.
9. It is pleasant and safe to take.
10. It has saved the lives of more people
than any other medicine in the world.
These are bold assertions to make regarding
any medicine, but there is abundant
proof of every one of the above statements
regarding the remedy. Every household
should have a bottle at hand. Get it today.
It may save a life. For sale by All Dealers.

THE HONGKONG DISPENSARY.

BIRTH.
On May 31, at Hotel de la Paix, Singapore, the wife of Capt. R. T. OLSEN, of a Daughter.

DEATHS.
At Stokes Dargavel, The Peak, at 3 a.m., on the 7th June, JOSEPH NEWMAN, beloved daughter of Newman and Janice Gibson Munford; aged 6 years and 11 months.

The funeral will pass the Monument at 5.30 THIS AFTERNOON.

At Hongkong, on June 5, Mrs. Mac ROBERTSON, Fitzroy, Victoria; aged 64 years.

At the General Hospital, Singapore, on the 27th May, J. RICHMOND, of Messrs Stevenson & Co., Manila; aged 30 years.

On the 28th May, at Loano, Sait, Zealand, WERNER NAME, partner in Hongkong & Co., Singapore, aged 37 years. (By Cable.)

The publication of this issue commenced at 4.20 p.m.

The China Mail.

HONGKONG, SATURDAY, JUNE 7, 1902.

While the commercial world is eager to learn the provisions of the new tariff which it is proposed to arrange with China, and the political world is jealous of the effect of new treaties and new alliances, it must not be forgotten that there are other forces at work which, in their way, will also greatly increase the volume of trade, and at the same time establish stable international relations. There is published in a recent number of the *Manu Kook Kwong Po*, or the *Review of the Times*, a proclamation by the Literary Chancellor of Shantung, in which he urges the students under his jurisdiction to rise and free themselves from the useless studies that are now in vogue, and revert to the more simple methods of the past. At the same time, he urges them to embrace heartily the curriculum of the West. He also mentions a number of books which will, in his opinion, furnish them with all necessary information. Dr. Allen, the Editor, has reviewed the proclamation, and has greatly assisted by his extensive knowledge, the Chancellor in the object which he has in view.

The following is a more or less accurate translation of the proclamation, and our readers can see for themselves that things are moving, even though they seem at times to be at a standstill. We have all heard that duty is arduous, knowledge is extensive, and that the determined scholar must be benevolent. Moreover, that he who would enjoy the later fruits must first endure the early toils, and that he who would become a scholar must give himself resolutely to learning. Now man's nature originally is good, and therefore he is differentiated from both birds and beasts. What he promises he can perform, and can also exert his influence over barbarian peoples. If we return and study industry, we find that letters and learning began to flourish in the days of Yno and Shun, which were unfolded in the proclamation of Tong, and reached down to the times of Confucius. But he first cultivated and published these regulations and doctrines, having collected them into the Six Classics. Thereupon the orthodox teachings became illustrious. He further compiled the Spring and Autumn Annals, whereupon thieves and marauders were afraid. His teaching was as clear as the sun and the heavenly bodies. From ancient times everything was clearly set forth.

All those who enter our pre-fectural colleges for study must understand and uphold the doctrines of our dynasties, in order to maintain righteousness and uphold truth. By the guide of a hair, we may discover the thousand harmonies. We can assuage the restless passions of the troubled sea. The present time is one of danger, we must use our talents very widely. In the examinations for the Kui Yan degree let us away with the eight divisions of the essay, and emphasize the righteousness taught in the Classics. Let us at the same time examine our national history and also urge ourselves to the study of Western sciences. From the practice of the eight divisions of the essay we get little but repetitions, banish all this empty confusion, and relegate it all to empty space. Its hold on us must be broken, and the whole system must be changed as we change the worn-out string of a bow or the deep rut of a carriage road. Let all scholars reside with the Sages, and study their doctrines deeply. Then shall they make the Classics and History the root, and their principles the source and spring of everything. We shall then become very deeply versed in universal knowledge, combining the ancient with the modern, and further shall understand the perfect harmonies that bind East and West together. But let it be insisted on that the study of the Classics and our national histories take the premier place, first in respect to the mastery of their language and then in regard to their righteous teachings. The principles of harmony and confusion, of losing and getting, government records with their rules and regulations, must be understood by heart, whereupon the people will not be led away or entangled by vicious doctrines.

But withal, at the same time the study of Western sciences is imperative, and in the very front rank must we place mathematics. Then in order will follow astronomy, geography, mensuration, drawing, and the different branches of naval and military study, international law and treaty stipulation. Also electricity, chemistry, light, and gymnastics. Both the nomenclature and the secrets of the sciences must be gone thoroughly into, with a view of getting at the solid and the useful. The Holy Sages say that 'if one studies widely all kinds of knowledge, it will be found that they are all pervaded by an all-pervading unity.' The Literary Chancellor will travel hither and thither, and do all that he can to improve the study of language.

If then we understand and grasp the most important subjects, both of Oriental and Occidental learning, they will open out the wide and the straight path. Students, too, must remember that Heaven dispenses to us our talents and that these are sufficient for the task. With shot doors we can study and apprehend, and, with this hope, we can reach our reward. But if men fear labour, and hanker after repose, they will involve themselves in ruin, and the same calamity will befall them if they simply delight in the new and seek the strange for its own sake. The mind must be definitely set upon wide reading, deep thinking, clear discrimination, and stern action. These four must be the target and the goal of all our study; therefore, let all students aim at them.

Dr. Allen, in his remarks on the instructions of the Chancellor, does not hesitate to speak the truth, and he strikes home in the words of the 'candid friend.' He first deals with the list of books which are assumed to be sufficient for students who are anxious to inform themselves about Western knowledge. He tells the Chancellor that the life of the average scientific book in the West is only ten years, when it is replaced by something better. He points out that the books translated here—in many cases at least—have been translated by those who did not understand their subject. Moreover, there is no system in the list, but the books are thrown together with a sublime indifference to this most important rule. In fact, without an adequate knowledge of the subject, a list has been made, with no other rhyme or reason, it would appear, than that the number—twenty-four—should agree with the number of native books mentioned on the same page. Is not this fulfilling one's duty in a very perfunctory manner? Dr. Allen further points out the many disabilities under which China labours to-day, and shows that the responsibility for them rests mainly upon the shoulders of the officials. He, for example, deals with the generals of the Chinese army in a very summary way. After reminding them once more of the great successes of the Japanese against the many forces which China sent to the front, he refers to the Tai-Ping Rebellion to emphasize the fact that what is wanted to-day is not men but officers. Was not General Gordon victorious? But of what was his army composed? They were farmers and shopkeepers, and mere boys at that, yet after he put them through their paces they were most efficient soldiers. To have then an army you must have officers, and before that you must get youths of talent and capable men to instruct them. Such caustic advice may not be very palatable, but in the *Review of the Times* it goes everywhere and must be read by a great many, and thereby both the Chancellor and the Editor are helping on effectively the opening up of China to Western influence.

Mistress: 'Jane, could you tell me what you want to go out this evening. Is it urgent?' Jane: 'No, mum; it ain't urgent. It's my gent.'

For the past quarter of a century there has been one continuous flow of letters bearing testimony to the truly wonderful cure effected by Charles's World-famous Blood Mixture. 'The first Blood Purifier that science and medicine have brought to light.' Sufferers from Scrofula, Boils, Eczema, Ringworm, Skin and Blood Diseases, Pimples and Sores of any kind are solicited to give it a trial to test its value. Sold everywhere, at 2s. 9d. per bottle. Beware of worthless imitations and substitutes.

CHANGE OF WATER.
OFTEN brings on diarrhoea. For this reason many experienced travellers carry a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy with them to be used in case of an emergency. This preparation has no equal as a cure for bowel complaints. It can not be obtained while on board the car or steamship, and is where it is most likely to be needed. Buy a bottle before leaving home. For sale by All Dealers - WARRICKS Ltd., General Agents.

LOCAL AND GENERAL.

Notes by the Way.
Two April death rate of Hongkong was 23.4 per thousand.

Harrison's Circus was to open at Singapore on the 2nd inst.

Mr H. N. Mody has been recognized as local Acting Consul General for Siam.

Mr G. C. Fullerton has resigned his Commission as a Lieutenant in the Hongkong Volunteers.

Information has been received of the death at Jerusalem on the 1st April of Captain E. G. Farquharson, R.E., Executive Engineer, P. W. D., Bengal.

We understand that 2nd Lieut. H. Grant Smith, of the 2nd Battalion East Yorkshire Regiment, left the Cape by the a.s. *Orient* for England, invalided.

It takes longer time to get mail matter from British North Borneo to Hongkong than from England to Hongkong. Our latest newspapers from London are dated 4th May; the latest from Sandakan 1st May.

Mr H. E. Ellen, chief engineer of the British steamer *Melbourne*, died of cholera while the steamer was in quarantine at Mariveles on the 27th May, and Mr Harrison, chief officer, died on the following day from the same disease.

On the 19th April, Mr H. Goldsmith (of Taiwan, British North Borneo) died from the effects of a gunshot wound received while out shooting with an officer of the *Messing*. He had slipped, and his rifle going off the bullet entered the biceps of his right arm. He was so collapsed when he reached a doctor that it was impossible to amputate the shattered arm, and he died of shock and loss of blood.

The *Manila Times* of the 3rd inst. says:—The cholera news from Cavite province is more encouraging. Dr H. A. Dunn, U. S. N., on duty with the Marines at Bacoor, who was seized with the disease almost simultaneously with Lieut. Rask, who succumbed, is getting on well. On Thursday night, he and Lieut. Rask visited Cavite and dined with the Navy officers at the Bungalow. They returned to Bacoor quite late in a banca. The lieutenant was taken with cholera about 1 o'clock that night and the doctor a short time later. There are several cases now at Cavite, one of the natives in the prison having died of the disease. The case of Warrant Mechanist Otto C. Dietrich, U. S. N., who died last Tuesday, has cast a cloud of gloom over the officers and warrant officers at Cavite, among whom the deceased was popular and highly respected. His death occurred in his house, contrary to what has been reported. He had been somewhat ill for a day or so, but nobody had any intimation that he was suffering from cholera. He was all right when seen by some of his fellows at 1 o'clock Tuesday afternoon, but at 6 o'clock he was found dead in his house. Death is supposed to have occurred about 4 o'clock.

Another Malaria Post.
The mophetic mosquito is, it seems, not the only propagator of malaria fever. An assistant of the Liverpool School of Tropical Medicine, now working on the 'West Coast of Africa, has found that an insect like that which causes 'fly disease' among horses in South Africa, also spreads the infection.

The New British Stamps.
The new British stamps just issued, and which represent the King crowned with a wreath, will undergo a change immediately after the Coronation, when the wreath will be replaced by a crown. It was considered inappropriate to represent the King with a crown on his head before the actual coronation had taken place.

Death of Lt. Col. Parkinson.
The *Singapore Free Press* of the 30th May says:—We regret to announce the death this morning from dysentery, of Lt. Col. F. F. Parkinson, A. P. D., which took place at his residence in Grange-road. The late Lieutenant-Colonel Parkinson received his Commission as long ago as January, 1863, and in March, 1881, he was appointed Army Paymaster. His next promotion was in March, 1886, when he became Honorary Major. In November, 1893, he was promoted to Staff Paymaster, and in November, 1898, he became Lieutenant-Colonel. He was originally a Captain in the Leicestershire Regt. The late Col. Parkinson has only been married three years, and leaves a wife and young child. He has been unwell for some time; it is said that he was not fit to come out again and was within six months of the time at which his pension became due.

CHARGE OF WATER.
OFTEN brings on diarrhoea. For this reason many experienced travellers carry a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy with them to be used in case of an emergency. This preparation has no equal as a cure for bowel complaints. It can not be obtained while on board the car or steamship, and is where it is most likely to be needed. Buy a bottle before leaving home. For sale by All Dealers - WARRICKS Ltd., General Agents.

LOCAL AND GENERAL.

News from the Philippines.
The Merchants Publishing Company has purchased the *Manila Times*.

Lieut. O. H. Rask, U.S. Marine Corps, succumbed to cholera at Bacoor on the 27th May.

Two Americans in the employ of the Civil Government died from cholera in Manila on the 2nd inst.

The following telegram was sent by Corbin to General Chaffee on the 23d May:—Prohibit shipment on transports animals, snakes, to the United States and Hawaii.

While a detachment of the 5th Cavalry were celebrating memorial day in the cemetery at Binangonan, Morong, a large band of hordes swooped down upon them and carried off five men and the municipal officials. It is believed the men will be held to ransom.

The Sunken Steamer 'Palsham.'
The *Palsham*, which sank in such a mysterious fashion in the Harbour the other day, is to be sold by auction as she lies. There is a small quantity of her inward cargo of rice from Saigon still on board.

The Rainfall.
During May the total rainfall recorded at the Observatory was 26.730 inches. Rain fell on 25 out of the 31 days, and the highest fall recorded on any one day was 6.760 inches. There were only 121 hours of sunshine. The highest temperature was 89.1 and the lowest 70.6, while the month's average was 79.4.

Cholera at Saigon.
The British Consul at Saigon has written to the Colonial Secretary, here confirming his telegram of 30th May stating that a twelve days' quarantine had been imposed at Saigon on arrivals from Hongkong, and adding that the French cruiser *Pascal*, after being a few days at sea returned to Saigon with cholera on board and was placed in quarantine.

Casualties in South Africa.
The following recent casualties are reported from South Africa:—21st May: at Pretoria, dangerously injured (commotion of the brain), Lieutenant A. Walker, attached to the Intelligence Department. At Marik's Drift, slightly wounded, Lieut. Stone Raper, Kimberley Horse.

A Screw Loose.
It looks as if bribery and corruption had been having free scope in Yauantai for a time, for quite a number of temporary employees of the Sanitary Board (Europeans and Asiatics) are on record on charges of accepting bribes. To-day the tables were turned, and a Chinese accountant was placed on the list on a charge of offering a bribe to a Sanitary Board foreman. He also was remanded. Bail in each case is fixed at \$500.

A Novel Recommendation.
A native applied at headquarters, Department of North Philippines, the other day for a position. He informed the employer that he had been working for Americans for some time, and being asked for a certificate of character, smilingly produced the following, bearing the signature of his former employer: 'To whom it may concern: This is to certify that this man has been in my employ from April 29th to May 7, 1902; that I owe him \$7 Mex., which he will probably never get.' He was given a position.

Callous Criminals.
The callousness and even the grim humour of condemned criminals is well exemplified by the following stories: On walking to the scaffold in solemn procession a criminal once called to the Governor of the Prison, 'Just oblige me, your honor, he said, 'by telling me the day of the week?' 'Monday,' answered the surprised Governor. Monday exclaimed the prisoner in disgusted tones; 'well, this is a fine way of beginning a week now is it?' And he marched on with a defiant grin on every line in his face. On another occasion an odious hangman whispered as he placed the white cap on his victim's head; 'If there's anything you'd like to ask me I'll be pleased to answer, yer know.' The victim craned his neck forward, and said in an equally low, but very much more anxious voice, 'You might tell me, is—is this plankin' safe?' Another hanging story: A chaplain said to a condemned man 'on his last night, 'You have been a bad man, a very bad man, but there is yet time for you to make a new beginning. Tell me, now, is there anything you would like me to help you in?' The culprit rubbed his chin thoughtfully for a minute or two, and made answer meditatively. 'What about learning the plannin'?' We are reminded by a reader (says *The Globe*) of the highwayman who was given a mug of ale on his journey to Tyburn. He blew off the foam because, said he, 'It's so bad for one's health.'

Labour Troubles in Manila.
The Americans do not have to seek their troubles in the Philippines. They brought their labour troubles upon themselves, but do not seem to realize it. The *Manila Times* of the 31st May says:—The Filipino labour question is fast approaching a crisis, certain branches of the Democratic Trades Union having made a demand for an increase of fifty per cent in their pay, with the alternative of a strike. The branches affected include nearly all the mechanical trades, such as printers and lithographers, lumber and sawmill men, tailors, tobacco workers, stove-makers, etc. Among employers in general there exists a determined opposition to the demands of the men, and a resolve to fight it out if necessary. It is contended that of late labour has in most cases received an increase of wages; and, moreover, that at the present time business is exceptionally dull, and it will be cheaper to shut down altogether, the alternative threatening the sacrifice of all profit and even a possible loss. They furthermore think the present demands are exorbitant, and that the men are not going about the proper way to obtain what they desire. On the 2nd inst., the whole of the Filipino workmen in E. O. McCulloch's printing establishment struck work for a 50 per cent increase. Senior D. Isabela, a large employer of labour and a landowner, is the prime organizer of the workmen of the various trades, and in a recent speech he is reported to have said:—'I do not care if they shoot me for the sake of my dear workmen, but what does concern me is their welfare, and that of theirs. Then again, do not say that I cannot be substituted; to say that would be an offense against our nation and myself, for it would imply that there are no other Filipinos worthy of taking my place, and who could not bring the union to a successful issue.' If the tobacco workers go on strike, there is a prospect of an all-round rise in the price of Manila cigars in the near future.

Bad Blood is the source from which our systems are built up, and from which we derive our vitality as well as our physical capabilities. If the blood is diseased the body is diseased. Sufferers from Scrofula, Boils, Eczema, Ringworm, Skin and Blood Diseases, Pimples, and Sores of any kind are solicited to give Charles's World-famous Blood Mixture a trial to test its value. Thousands of wonderful cures have been effected by it. Sold everywhere at 2s. 9d. per bottle. Beware of worthless imitations and substitutes.

LOCAL AND GENERAL.

Plague.
The cases of plague reported to-day number seven, including a Portuguese from the a.s. *Skut*. All seven cases were fatal.

Hongkong Christian Union.
The usual weekly prayer meeting will be held on Monday evening at 5.15 in the Room of the Union, 13 Beaconsfield Arcade. The Ven. Archdeacon Bagster will preside. All Christians are cordially invited.

Alleged Embezzlement.
A shroff in the employ of the Telephone Company has been remanded at the Magistrate's on a charge of embezzling a sum of \$25. The money, it is alleged, was received by him in February, he signing the bill book, but it was never paid over to the Company.

The Export Tea Duty.
In a Notification dated 28th May, the Commissioner of Customs at Foochow informed the public that he had been directed to collect tea duty at the rate of 5 per cent, ad valorem, from the 29th May, and requested shippers to state values on their applications. The reduction is very welcome (says the *Foochow Echo*), but it is feared that it has come too late to bring about any increase in the volume of the trade.

Iloilo Harbour.
In all probability, (says the *Iloilo Times*) no harbor in the Philippine archipelago presents any better and more natural advantages than does the harbor at this place, but in the face of all this, ships and shipping interests are constantly menaced by the condition of the river where the boats enter to come up to the wharf. It is almost a daily occurrence for boats to stick at this place, and they are lucky if they get off or through without coming into contact with some one of the five old vessels which were sunk in this entrance just before the insurrection. A boat drawing twelve feet can scarcely enter, while if the proper improvements were made, boats drawing twenty feet could enter with ease. A boat the size of the *Kaifong* has to lie out in the bay and discharge by lighters. An appropriation of \$5000 was once made to make a survey and take steps toward improvement. Two surveys were completed, but nothing came of them. A third survey was just about completed when the official in charge was ordered away to another point. Since that time, nothing has been done, and although Colonel Colton has frequently submitted the matter to the proper authorities, they appear to be entirely unconcerned. If the present conditions continue, the only outcome will be the decline of this city's trade. (In this connection, we may mention that some Americans had a high opinion of Iloilo in 1899. We were assured by one staff officer that he believed Iloilo harbour could be made one of the best in the world, and he had a firm belief that it would be the port of call for all steamers from Singapore to China and Japan! He seemed an intelligent fellow, too. Anyone who has seen Iloilo harbour and realized—putting aside entirely geographical considerations—will have only one opinion of that officer's judgment.—E.A. C. M.]

Labour Troubles in Manila.
The Americans do not have to seek their troubles in the Philippines. They brought their labour troubles upon themselves, but do not seem to realize it. The *Manila Times* of the 31st May says:—The Filipino labour question is fast approaching a crisis, certain branches of the Democratic Trades Union having made a demand for an increase of fifty per cent in their pay, with the alternative of a strike. The branches affected include nearly all the mechanical trades, such as printers and lithographers, lumber and sawmill men, tailors, tobacco workers, stove-makers, etc. Among employers in general there exists a determined opposition to the demands of the men, and a resolve to fight it out if necessary. It is contended that of late labour has in most cases received an increase of wages; and, moreover, that at the present time business is exceptionally dull, and it will be cheaper to shut down altogether, the alternative threatening the sacrifice of all profit and even a possible loss. They furthermore think the present demands are exorbitant, and that the men are not going about the proper way to obtain what they desire. On the 2nd inst., the whole of the Filipino workmen in E. O. McCulloch's printing establishment struck work for a 50 per cent increase. Senior D. Isabela, a large employer of labour and a landowner, is the prime organizer of the workmen of the various trades, and in a recent speech he is reported to have said:—'I do not care if they shoot me for the sake of my dear workmen, but what does concern me is their welfare, and that of theirs. Then again, do not say that I cannot be substituted; to say that would be an offense against our nation and myself, for it would imply that there are no other Filipinos worthy of taking my place, and who could not bring the union to a successful issue.' If the tobacco workers go on strike, there is a prospect of an all-round rise in the price of Manila cigars in the near future.

Bad Blood is the source from which our systems are built up, and from which we derive our vitality as well as our physical capabilities. If the blood is diseased the body is diseased. Sufferers from Scrofula, Boils, Eczema, Ringworm, Skin and Blood Diseases, Pimples, and Sores of any kind are solicited to give Charles's World-famous Blood Mixture a trial to test its value. Thousands of wonderful cures have been effected by it. Sold everywhere at 2s. 9d. per bottle. Beware of worthless imitations and substitutes.

TELEGRAMS.

[REUTERS SERVICE.]

THE LOAN BILL.

London, 5th June, 1902.
Sir Michael Hicks-Beech, at the third reading of the Loan Bill, estimated the expenditure for the current year at £176,354,000, leaving a deficit of £24,000,000. He was, therefore, compelled to retain the Corn Tax.

A SURRENDER.

The Boer Commandant Potgieter has surrendered to the British.

SIR JOHN CARRINGTON.
Sir John Carrington, C.M.G., late Chief Justice of Hongkong, was present at the Lord Mayor's banquet given in honour of His Majesty's judges.

BRITONS AND BOERS.

Telegrams now coming to hand testify to a notable fraternization between the Boers and the British.

THE LAND TAX.

Sir Michael Hicks-Beech has stated in the House of Commons, that the exemptions under the Land tax do not include minerals which have to defray a portion of the cost of the War.

THE FRENCH CABINET.

Sir Combes is forming a new French Cabinet.

THE GRANT TO LORD KITCHENER.

The Grant of £50,000 for Lord Kitchener was moved by Mr. Haldane in the House of Commons in the most eulogistic terms, and warmly supported by Sir Henry Campbell-Bannerman. Mr. Redmond, who began an abusive attack on Lord Kitchener, was speedily silenced, and the grant was passed by 380 votes to 44.

COUNT MATSUGATA.

Count Matsugata has been received by President Loubet.

CANTON NOTES.

[From Our Own Correspondent.]

CANTON-HANKOW RAILWAY.

Canton, June 6.
A telegram has been received in Canton from Sheng Tsai-tai, who, it will be remembered, is charged with the construction of the grand trunk railway between Canton and Hankow. He holds out no prospect of the immediate carrying out of that enterprise. He speaks of the difficulty of obtaining suitable men to do the work, and the still greater difficulty of getting the large sum required for this undertaking. He is averse to the employment of foreign capital as that would entitle foreigners to have a say in the control of the railway. Shareholders are warned that it will only be after a period of years that the railway will begin to pay dividends. On the other hand, the benefits of a railway will be felt by the districts through which the railway passes. Sheng Tsai-tai's suggestion, therefore, is that the people in the cities and villages along the route should find the required capital. Good and sound as this reasoning may appear to people who know from experience the blessings of railways, it can have but little if any weight with the Chinese, who, to begin with, are prejudiced against railways. The Tsai-tai further suggests that a beginning should be made by raising a capital of one hundred thousand dollars. This money, he recommends, should be placed with the native bankers at six per cent per annum. From this, it would appear that he does not anticipate that the money will be required for some time to come. For the present, therefore, it may be said that unless some force from the outside can be brought to bear on Sheng Tsai-tai, the prospect of railways in South China is not bright.

THE TAXATION OF PASSAGE-BOATS.

Although the Viceroy supported the appeal of the passage-boat owners against paying an increased taxation of ten per cent on their earnings, the officials directly benefited have succeeded, for the time at least, in carrying their regulations. One of your Chinese contemporaries, the *Chung Kwei Pao* has said some very strong things about this business. The mandarins concerned are plainly told that they, screened by their office, are playing the part of robbers and blackmailers.

ITEMS.

The enlightened directors of the Provincial University have determined to appoint a Chinese doctor trained in Western medicine to look after the health of the students.

On the whole, there is a decided improvement in the health of Canton. Cholera and plague are on the decrease. The reports from many parts of the country are serious. In some villages, hundreds of people have died from the bubonic plague.

When the gods would destroy they first give a wrong tip on the stock market.

I HAVE taken Stearns' Wine of Cod Liver Oil for general weakness and debility, and am pleased to say that I have derived great benefit from it. I shall recommend it to my friends as being invaluable as a tonic.

Yours truly,
G. WALL,
Sussex Road, Southampton, England.

A HOLIDAY IN NORTH FORMOSA.

A Visit to Savageland.

Few people realise what an interesting and pleasant holiday place North Formosa has become, and with what comfort excursions can be made from Taipei now that the country has been opened up by roads and railways. There are now three lines of railway out of the capital, and five trains each way between Taipei-Keechung and Taipei and Tamsui, and three trains on the Southern line for a distance of 60 miles to Sincihue, so that many trips which formerly took days can now be done in one day.

There are also clean and comfortable Japanese hotels at many places, particularly at the sulphur springs, Hokuto, which has become quite a popular resort.

To the stranger who does not speak Chinese or Japanese, travelling would be a little awkward, but probably guides and ruidbooks will be available before long. To the traveller going to or coming from Japan, Formosa is well worth taking in on the way, and to the resident of South China who never sees a railway train the trip and progress since the Japanese occupation will be a surprise.

Our party left Tamsui at 6 a.m.—two on bicycles, three in rickshaws. We rode through the broad and clean streets of Taipei, and out at the south gate, then along the wide smooth road to Sincihue, where we paid off our rickshaws and engaged two coolies to carry our provisions, &c. We then crossed the river in a ferry boat, walked about two miles until we came to a mountain pass, where the bicycles had to be carried and soon afterwards crossed the river again, which is very winding. About 9.30, we reached Kishu, a frontier village, where we struck the new road made by the Doyura Plantation Company along the river bank. About an hour's walk brought us to the head of the navigable water and another ferry. Almost all the country we passed through was cultivated, the hills growing tea and the lower ground rice, sweet potato, taro, hemp, &c.

About a mile from the river, we came in sight of the Doyura Plantation Company's fortified station, where the hospitable manager made us very welcome, and asked us to stay the night. After resting and partaking of refreshment, we started out on a ramble, following the river, for the hills were precipitous, and I may say there was no level ground. We were accompanied by our genial host, Mr. Tsai, and a Japanese, who spoke the savage dialect. Several good photographs were taken of the grand mountain scenery, which is wild in the extreme. Two of us strolling on ahead came to a rough shelter, the remains of a fire and a path running up the hillside, which we concluded led to the savage village. A rustling of the branches above warned us that someone was about, and presently five natives appeared, a man and four women—strange, fantastic creatures, with tattooed faces, grey coloured clothes, and large earrings. The man saluted me by putting his hand on my breast, and I put mine on his. We then distributed a few cigars, for all smoked, and sat down and admired each other.

The women all carried packs on their backs, containing native cloth, deer skins and horses, which they were taking to market. One of the women was an old hag, but the younger one might be described as pretty, in spite of the tattoo marks, which extended from ear to ear, including the mouth, not unlike a ribbon an inch wide. There was also a tattoo mark on forehead and chin.

Their jewellery consisted of brass bangles, curiously carved earrings and beads of various kinds. The clothing might be described as scanty but sufficient. On the arrival of the interpreter with the rest of the party, we returned to the station, where our enthusiastic photographers were very busy taking savages in all kinds of attitudes. Soon after our return, a hunting party arrived, a dozen men with dogs and a deer, which they had just killed. All were armed with long knives and mawar rifles, the stocks of which were home-made and curiously carved and secured to the barrel with neat turk's-heads of rattan. We secured some venison. More photographs were taken, and the natives partook of a good meal provided by the Doyura Company in the rest house provided for them. The natives used their hands, as the Malays do, instead of chopsticks. They told us they were off on another hunt, for wild pig before night.

The Doyura Company has acquired several thousand acres of land on the savage borders, which it is clearing and planting with timber trees. They have a nursery at this station, and already they have planted several hundred acres and some millions of young trees. I understand they have established a similar plantation in South Formosa so that in time the savage territory will be much curtailed, and those rich hillside and fertile slopes made to yield something besides a few deer and wild pigs.

The "savage problem" is a serious one for the Japanese, but there seems a very good prospect of the happy hunting grounds being absorbed peacefully.

On our return, we decided to shoot the rapids as a rapid boat was engaged, and our party started at 8 a.m., after a good breakfast. The weather was glorious, the scenery inspiring, and shooting the rapids most exciting. Rapids, long clear reaches, deep pools, high cliffs and wooded hills, a succession for two hours when we reached Sincihue, where the wheelmen left us, and we, who wanted more rapids and the comfort of an easy gliding boat, continued down river, reaching Taipei about noon.

We would gladly have lingered another day away from the busy haunts of man, but letters, telegrams, and steamers had to be thought of, and we left by the 5.10 train for Tamsui and said goodbye to the *Delicia nivalis* life in fair Formosa.

TYPHOON IN LUZON.

The Cable Broken.

The *Mandarin Times* of the 3rd inst. reports:—The typhoon announced by the weather bureau struck the island on Sunday afternoon. After a drenching downpour which lasted all the latter half of the afternoon and well into the evening, the rain ceased, and to be followed towards midnight by a high wind. Several houses were thrown upon the Luneta beach, as well as a number of logs which had the appearance of having been torn from some raft. The rain began before daylight and his for last for a day or two.

The accident to the Hongkong cable, it is believed, may be due to some ship dragging its anchor on account of the violence of the gale. The break was discovered Saturday night. There are two cable boats in Oriental waters, but just at present it is not known exactly where they are. The telegraph lines throughout the island are reported to have suffered from the present storm and but little has been heard from the various provinces since Sunday morning. The lines to the south are in tatters and the cable connections to the southern islands are out of order, no doubt due to the present typhoon that is raging throughout the Archipelago.

The second typhoon signal was up at the office of the Captain of the Port at 11 o'clock yesterday, it having been hoisted at 4.50 o'clock Sunday afternoon. The bay is so rough that the *Navy Ferry Boat Rapid* did not make her customary trip in the afternoon. She came over yesterday as usual. There were only two arrivals in the forenoon.

HONGKONG SHARE REPORT.

In their weekly share report, dated 6th June, Messrs Deans, Kelly and Potts write:—

During the week under notice, business has been more or less of a nominal nature, and very few sales of any importance have been effected. Hongkong and Shanghai Banks have been little more in demand and have risen in value, while, most stocks in the Insurance Departments show a decline on the previous week's quotations.

Rebels.—Hongkong and Shanghai Banks have further strengthened their position, and shares have advanced, lands at \$307½. The latest London quotation is \$32.10½. We have heard of no business in National Marine Insurance. Unions are on offer at \$387½. Cansons are in the market at the reduced rate of \$467½, and China Tenders can be obtained at \$56, after sales at the figure. Yangtze ships are in some demand.

Fire Insurance.—Hongkong Firms have been sold to a small extent at \$550. China Firms have been negotiated at \$80 and \$78, at which latter rate there are further enquiries.

Shipping.—Sales of Hongkong, Canton and Amoy Steamboats at \$38½ have again taken place and more shares are obtainable at the price. Indo-China have risen and have sales at \$128. Doyura Steamships are in order and can be bought at \$46. Other stocks in this section are without business.

Refineries.—Small parcels of China Sugars have been put with at \$113 and \$112. *Latex.*—There are sellers of Punjuns at \$4½. Rubbers are offering at \$0, and Jobbers have fallen to \$1.

Doles, Halfpenny and Goldens.—Hongkong and Shanghai Banks have been purchased at \$22½. *Parasols* are unaltered with sales at \$15.25. *Keweenaw* Wharves have been sold at \$87½. *Hongkong Wharves* have jumped to \$340.

Lands, Hotels and Buildings.—Hongkong Lands have been fixed at \$175 and \$177½. *Hongkong Hotels* are steady, and business at \$137½ has again resulted. *Humphreys' Estate* have been placed and are still procurable at \$12. *China Providents* have found buyers and more are wanted at \$92.

Cotton Mills.—There is no business to report.

Cigar Companies.—No transaction has taken place in stocks under this heading.

Middlemen.—Green Island Cement is quiet with sellers at \$21½. A. S. Watsons are to be had at \$14½. *Electricies* are offering at quotations. *Langhams* have been done in Shanghai at the advanced rate of \$12.287½.

Kino Edward has decided that there shall be no court juster at the Coronation ceremonies. *Edie Fodick.* *Perhaps* he will let Alfred Austin write one of those funny little solemn pieces, *added Keedick.*

There is no particular time of the year for taking

Stearns' Wine of Cod Liver Oil. The time to take it is whenever it is needed—when the system is disordered by colds or by exposure to untimely languor and depression, when the body is in an atonic state. If you are losing flesh, if your appetite is poor and you do not relish your food, if you are pale and weakly, if you are overworked with no disposition to recreation, and need Stearns' Wine. Wholesale from A. S. Watson & Co., Ltd., Hongkong.

THE LOSS OF THE 'YUKO MARU.'

The *Yokohama Echo* of the 31st May says:—

Some further particulars have reached us regarding the wreck of the *Yuko Maru*, which took place on the 9th instant, the steamer having run on the Castle Rock, and, filling, sank in 30 fathoms of water.

Mr. J. Goides of the Imperial Maritime Customs, stationed at Tung Chan, saw, as he looked outside the office at about 10 o'clock in the morning of that day, a steamer outward bound from Santa, but took no special notice of it and returned to his office. A few minutes later, he heard loud and continuous whistling, and running out with his glass he observed that the same steamer was drifting astern and was evidently calling for assistance. He immediately jumped into his sampan, and pulled off with all possible speed to her. On his approach, he saw that the vessel was sinking by the head, and coming within speaking distance he called to the purser who was standing aft to throw over the mails. This the purser did, and then jumped himself, just in time, as the vessel began to disappear head foremost; and before the whole hull was out of sight there was a terrible explosion and all the stern of the vessel was blown away.

This explosion had the effect of driving Mr. Goides's sampan back, away from her position, or, as it would have been, down in and have gone down with the wreck. With the disappearance of the vessel, the sea was left a mass of wreckage, interspersed with human beings struggling for life. Mr. Goides lost no time in setting about the work of rescue. His curious coincidence, the captain and the chief mate were both returned to the scene of the disaster, the former with a life-belt with the name of the steamer on it. In a short space of time, seventeen were rescued, and the sampan being full these were taken on to the larger boat of the *Yuko Maru*. Mr. Goides returned to the scene of the disaster and succeeded in saving ten more lives. There were still seven unaccounted for, and it is supposed that these were either killed in the explosion or were carried down with the wreck, and drowned. Everything was done by the Customs Officers to alleviate the sufferings of the rescued, several of whom were badly wounded. A message was sent to the Rev. Dr. Mackenzie at the nearest missionary station, who started at once with supplies to render assistance, but he was not by a second messenger after a five hours' walk in pouring rain and informed that all the survivors of the wreck had been taken to Fouchow by one of the small Japanese steamers, who had unexpectedly arrived.

But for the disaster occurring where it did, within half of a link station where a European happened to be the whole of these lives would have been lost. The promptness of Mr. Goides's action is beyond all praise, and without doubt he will be awarded the Albert Medal for gallantry in saving life at sea.
